Applications

Delivering Product
Safely Worldwide

High Performance Kraft Liner Board made with virgin fibre for strength

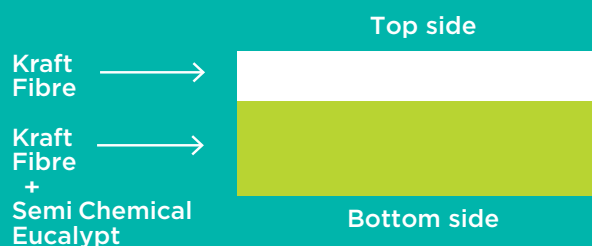

- ▶ Virgin (new) fibre
- ▶ High performance fibre blend
- ▶ Enhanced Ring Crush and Short-span Compression Test (SCT) for stacking performance
- ▶ Lighter weight options allow cost reductions

The inclusion of semi-chemical pulp leads to improved performance in high and cyclic humidity environments.

With enhanced Ring Crush strength and SCT, HP Kraft Liner Board enables light-weighting and optimisation of your board selection.

Sheet Structure

Our Markets

Opal Australian Paper's integrated pulp and paper mill is one of Australia's largest pulp and paper manufacturing facilities. It operates five paper machines, three pulp mills and two recycling mills.

With primary markets in Australia and New Zealand, Opal Australian Paper also exports to many countries throughout Asia, Europe, the USA, Latin America, the Middle East and Africa.

Certifications

Opal Australian Paper is certified to the following management system standards, ISO 9001, ISO 14001 and AS/NZ 4801, and to the Program for the Endorsement of Forest Certifications (PEFC™) and Forest Stewardship Council® (FSC® C002059).

Certified Wood Sourcing

Opal Australian Paper purchases 100% of our wood from local Victorian suppliers.

We are committed to ensuring that our wood is from responsibly managed sources and that the areas from which we source are replanted and regrown after harvest.

Key to this commitment is our requirement for major wood suppliers to be independently third party certified. Certification is a way of demonstrating that a forest is being managed sustainably and biodiversity is maintained. Certified forestry managers are regularly audited to ensure appropriate forestry practices are in place.

Opal Australian Paper is Chain of Custody Certified to the Program for the Endorsement of Forest Certifications (PEFC™) and Forest Stewardship Council® (FSC® C002059), which are the two major global forest certification systems. Our High Performance Kraft Liner Board is PEFC certified.

Food Contact Assurance

Opal Australian Paper adheres to a rigorous system of control and approval of raw materials used in the production of packaging products.

High Performance Kraft Liner Board products have been tested by an independent and accredited laboratory to confirm food compliance conformance to globally recognised standards, such as the US FDA's Packaging & Food Contact Substances Notification program and the European BfR Recommendation XXXVI on Paper and Board for Food Contact.

Please refer to High Performance Kraft Liner Board technical specifications for specific information, including guidance for food contact applications.
