

How'd that banana get there?

Ever find yourself wondering how your fruit made it to your fruitbowl, without getting bruised and beaten like they do in your lunch box?

Opal is a packaging industry specialist with solutions which add value to customers through our high performance.

Opal's multi component designs allow us to lightweight our packaging compared to industry competitors, without compromising on our unrivaled strength and durability.

Opal.

Close that loop

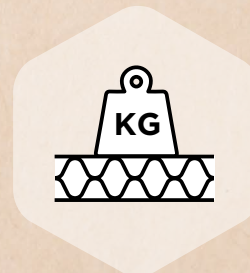

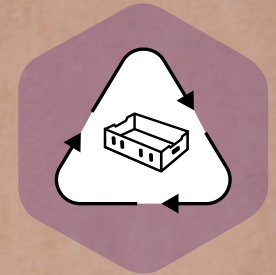

Collection

We select superior high quality cardboard from major retailers like Aldi, Kmart, Woolworths, Target and Myer. This helps close the recycling loop for growers, brands, and retailers.

Recycling

Good quality ingredients are essential to producing good quality products. The high quality corrugate we collect is diverted from landfill and given new life as premium recyclable packaging.

Production

Opal's advanced mills produce high performance fibre packaging. The unrivaled board strength of Xitex® will see your banana's are safely protected throughout the supply chain.

Delivery

With a network across Australia, Opal's packaging is available wherever your goods are grown. We work with you to increase your box and pallet packing efficiencies, maximising delivery yield.
