## Opal Fibre Packaging Opal Linerless Meat

# Poly-bag free meat carton

Opal's fully recyclable aqueous coated meat carton and lid is an ideal replacement for traditional poly based solutions.

Designed to protect frozen meat and eliminate poly-entrapment, Opal's Linerless Cartons come in a variety of forms to suit your products needs.

### **Features**

- A recyclable alternative to typical box and liner solutions
- No poly bag required, as cartons are coated with moisture barrier
- Leakproof design
- Available in hand erect (smaller volumes) or machine erect (high volume)
- Machine Erected Linerless Carton uses a fully automated production process, reducing labour costs
- Complies with Australian food safety regulations including contact and export requirements
- Available in various carton sizes to accommodate your requirements
- Tailored sizes to accommodate your requirements

### **Product Advantages**

### **ENVIRONMENT**

Non-poly paper-based substrate

## **FUNCTION**

Poly bag-free, eliminating poly-entrapment

### FIT-FOR-PURPOSE

Leakproof design with excellent meat- release properties
